## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

2. Claims 11 – 15 and 20 – 23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 11 and 20 have the following limitation: “said semiconductor surface comprising at least one completed semiconductor device, said at least one completed semiconductor device being densely packed and having a relatively large surface area”. The specification does not disclose what constitute a “densely packed” semiconductor device and what is the range of the “relatively large” surface area. The limitations that describe the “at least one semiconductor device being densely packed” having “a relatively large surface area” is bound to subjectivity.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 2823

4. Claims 11 – 14 and 20 – 22 are rejected under 35 U.S.C. 102(e) as being anticipated by Wu (U. S. patent 6,489,237 B1).

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention “by another,” or by an appropriate showing under 37 CFR 1.131.

Wu discloses providing a semiconductor surface (10) the semiconductor surface including at least one completed semiconductor device (Column 1, Lines 17 – 21); depositing a stress relief interface layer (14) over the semiconductor surface; and creating at least one opening (15) through the stress relief layer; the stress relief layer relieving stress introduced by mismatched Coefficient of Thermal Expansion (CTE) of thermally interacting layers; the stress relief interface layer including polysilicon (Column 1, Lines 32 – 35).

***Allowable Subject Matter***

5. Claims 1 – 5, 16 – 19 and 24 – 31 are allowed over the prior art of record.

***Response to Arguments***

6. Applicant's arguments with respect to claims 11 and 20 have been considered but are moot in view of the new ground(s) of rejection.
